Proficiency Testing - A Tool for Sustainable Business

QUALITY is an important factor for sustainable business and uplift society standard. Without testing quality cannot be ascertained and the laboratory involved in the testing always having a challenge to demonstrate satisfactory competency. Participation in Proficiency Testing (PT) is only easiest tool for the laboratory to establish goodwill.

The benefits of proficiency testing are widely recognized, these include:

1. Establish goodwill of the lab
2. Mandatory to maintain the accreditation as per ISO/IEC 17025
3. Regulatory need (FSSAI, BIS, APEDA, EIC, MoEF etc.)
4. Build confidence of analysts / scientists
5. Customer Satisfaction
6. Identify analytical/measurement problems
7. Tool for growth of the laboratory.

Till time International PT was only choice for the lab with unbearable cost. Alternatively, if laboratory conducts ILC program, then required 8-11 accredited laboratories to evaluate the results statistically.

Aashvi Proficiency Testing & Analytical Services is organizing PT rounds on Food products, Pharma Products & Water in chemical and biological fields and Precious metals & Packaging materials in chemical field.

Now participation in International PT is not mandatory. Moreover, participation in Aashvi PT is economical than ILC.

Uplift laboratory goodwill by participation in PT.

Aashvi-PT also provides range of services including Training (Quality, Regulatory & System), Customized Quality Assurance services, designing & developing in-house and commercial testing laboratories & System implementation as per ISO/IEC 17025:2017.
